

YOU ARE INVITED TO BREKKIE & BRIEF

Central Room A
Friday 15 June 2018
7.00am – 7.55am

Please join us for breakfast at our upcoming Brekkie & Brief where Dr Wayne Carey will discuss the structural and cosmetic restoration of the perioral region with Teoxane's new RHA dynamic fillers.

Dr Wayne Carey
Associate Professor of Dermatology
Canada

Dr. Wayne Carey's main interests are dermatological surgery, cosmetic procedures, MOH's surgery, reconstruction and clinical research. He was one of the founding members of the Canadian Society of Dermatologic Surgery. He is also CEO of Siena Medical Research Corporation which is involved in clinical research.

Dr. Wayne Carey pioneered the technique of long lasting volume filling of the cheek using hyaluronic acid injections called Tri Site Bolus technique, a patented technique in Canada and the USA.

He has demonstrated his technique internationally at numerous workshops and lectures around the world. The technique involves strategic points of injection and volume of material using hyaluronic acid.

To secure your spot, RSVP by Friday 1 June using the registration button below.
